Elrace Mobile App — Notifications Guide

What notifications users receive, when they are sent, and what they say

15 October 2026

About this document. This document lists every notification the Elrace mobile app shows, grouped by module. For each notification, it shows:

- when it is sent;
- who receives it;
- the title and message text the user sees;
- what happens when the user taps it.

Words in *{curly brackets}* are filled in automatically (for example *{Employee name}*).

1. How notifications work

1.1 Where notifications come from

Source	Examples
Odoo (ERP)	HR requests, LPO / invoice / petty cash approvals, projects, documents, attendance, admin messages
Chat and Tasks	Chat messages, tasks and tickets, shared notes, signed documents
Announcements	Circulars and announcements published in Odoo
The phone itself	Prayer times, task reminders

1.2 Notification flow

1. Something happens in the business, for example an employee submits a leave request or a manager approves an LPO.
2. The system checks whether the receiver has **muted** this category in the app settings. If it is muted, nothing is sent.
3. The receiver gets a notification on their phone:
    - **App closed or in background:** it appears in the phone's notification bar.
    - **App open:** it appears as a banner at the top of the screen. Chat messages are not shown for the chat the user currently has open.
4. Most notifications are also saved in the app's **Notification Center** (the bell icon).
5. The **bell badge** shows how many new notifications arrived since the user last opened the Notification Center.
6. When the user opens the Notification Center, all notifications are marked as read.

1.3 Muting notifications

Users can mute notifications by category from **Profile** → **Notification settings**. The categories are:

- **Waiting approvals:** HR requests, LPOs, invoices and petty cash
- **Chat**
- **Tasks**
- **Tickets**
- **Prayer**
- **Alerts:** weather and safety
- other categories configured in Odoo

2. Notifications by module

2.1 HR — Employee Requests

Covers leave, sick leave, short leave, job mission, effective date update and temporary permission.

Notification	When it is sent	Who receives it	Title	Message	On tap
New request	Employee submits a request from the app	Next approver	Depends on type: “Leave Request”, “Sick Leave Request”, “Short Leave Request”, “Job Mission Request”, “Effective Date Update Request”, “Temporary Permission”. Other types: “New Request Submitted”	“*{Employee name}* has submitted a *{request type}*.” Other types: “*{Employee name}* submitted a new request.”	Nothing opens
Request approved	Approver approves the request in the app	Employee who submitted	“Request Approved”	“*{Approver name}* has approved your request.”	Nothing opens
Request rejected	Approver rejects the request in the app	Employee who submitted	“Request Rejected”	“*{Approver name}* has rejected your request.”	Nothing opens
Next approval needed	Request moves to the next approver	Next approver	“New Request to Approve”	“A new request from *{Employee name}* needs your approval.”	Nothing opens
Request rejected (from Odoo web)	Approver rejects with a reason in Odoo web	Next approver, or the employee	“New Employee Request Approval”, or “Employee Request Processed”	“*{Request}* requires your approval.”, or “*{Request}* has been fully processed.”	Nothing opens

Notification	When it is sent	Who receives it	Title	Message	On tap
New employee registered	HR confirms a new employee in Odoo	Employee's direct manager	"New Employee Registered: *{Name}*"	"Employee *{Name}* has been confirmed and added to the system"	Nothing opens

2.2 Approvals — LPO, Invoice and Petty Cash

Notification	When it is sent	Who receives it	Title	Message	On tap
Approval request	Document is sent for approval	First reviewer	"New LPO Approval Request" / "New Invoice Approval Request" / "New Petty Cash Approval Request"	"*{Document no.}* requires your approval."	Nothing opens
Level approved	A reviewer approves one level	Person who created the document	"LPO Approved" / "INVOICE Approved" / "Petty Cash Approved"	"*{Approver name}* approved *{Document no.}*"	Nothing opens
Next level needed	Document needs another approval level	Next reviewer	"New LPO Approval Required" / "New INVOICE Approval Required" / "New Petty Cash Approval Required"	"Please review *{Document no.}*"	Nothing opens
Fully approved — LPO	Last level approved	All reviewers	"LPO has been issued"	"*{Vendor name}*"	Nothing opens
Fully approved — Invoice / Petty cash	Last level approved	All reviewers	"Invoice Fully Approved" / "Petty Cash Fully Approved"	"*{Document no.}* has been fully approved."	Nothing opens
Approved / rejected from the app	Reviewer approves or rejects from the app	Person who requested	"Purchase Order Approved" / "Journal Entry Approved" / "Expense Report Approved" (or "… Rejected")	"*{Approver name}* approved / rejected *{Document no.}*."	Nothing opens
Next approval (from the app)	Same as above, when another level remains	Next reviewer	"New Approval Required"	"Please review *{Document no.}*"	Nothing opens
Petty cash submitted	Employee submits petty cash from the app	Reviewer	"Petty Cash Request Submitted"	"*{Employee name}* submitted a petty cash request of *{amount}* AED."	Nothing opens
Petty cash paid	Petty cash is paid	Reviewers	"Petty Cash Paid"	"*{Petty cash no.}* has been paid."	Nothing opens

2.3 Projects

Notification	When it is sent	Who receives it	Title	Message	On tap
New project	A new project is created	Everyone on the project staff list	“New Project Assigned”	“You have been added to *{Project name}*”	Nothing opens
Added to project	An employee is added to a project’s staff list	That employee	“New Project Assigned”	“You have been added to *{Project name}*”	Nothing opens
Project completed	Project status changes to Completed	Everyone on the project staff list	“Project Completed”	“Project *{Project name}* is now completed”	Nothing opens

2.4 Documents and Shared Folders

Notification	When it is sent	Who receives it	Title	Message	On tap
Document expiring	Every day, for documents expiring within 30 days	Employee who owns the document	“Document expiring soon”	“*{Document}* expires on *{date}*. Please renew it.” If there are several: “You have *{n}* documents expiring soon…”	Nothing opens
User added to folder	A user is added to a shared folder	All folder members	“Shared Folder Update”	“New user has been added to the shared folder ‘*{Folder}*’.”	Nothing opens
User removed from folder	A user is removed from a shared folder	All folder members	“Shared Folder Update”	“A user has been removed from the shared folder ‘*{Folder}*’.”	Nothing opens
Document signed	A document sent for signature is signed	Person who sent it	“Document signed”	“*{Signer name}* signed”*{File name}*””	Opens a chat screen (incorrect)
Note shared	Someone shares a note	Person it was shared with	“Note shared with you”	“*{Owner name}* shared”*{Note title}*””	Nothing opens

2.5 Circulars and Announcements

Notification	When it is sent	Who receives it	Title	Message	On tap
Circular / Announcement	A circular or announcement is published in Odoo	All employees, or the selected employees	“Circular published” / “Announcement published”	First 180 characters of the circular or announcement text	Opens **Circulars & Announcements** on that item

2.6 Attendance and Face Enrolment

Notification	When it is sent	Who receives it	Title	Message	On tap
Attendance updated	Attendance is pulled manually from BioTime	Employee	“Attendance Updated”	“Your attendance has been synced from BioTime. Please update the Project location.”	Refreshes today’s attendance
Face enrolment ready	A labourer’s face photo is ready for attendance matching	Labourer’s foreman	“Face enrollment verified”	“*{Labourer name}* (File ID: *{ID}*) is ready for attendance matching. Open Site Management to sync if needed.”	Nothing opens

There are no notifications for timesheet submission or approval.

2.7 App Menu and Admin Messages

Notification	When it is sent	Who receives it	Title	Message	On tap
App menu changed	An employee’s dashboard widgets are changed in Odoo	That employee	“Your app menu changed”	“Your dashboard widgets were updated. Please re-login to see the changes.”	Nothing opens
Admin message	Admin sends a message from **Mobile Admin Notification** in Odoo	All staff (not labour), or selected employees	Written by admin	Written by admin	Nothing opens

2.8 Chat

Notification	When it is sent	Who receives it	Title	Message	On tap
New message (one-to-one)	Someone sends a chat message	The other person	“*{Sender name}*”	Message text, or “📷 Photo”, “📎 File”, “🎵 Voice message”, “🎬 Video”, “📝 Document for signing”	Opens the chat
New message (group)	Someone sends a group message	All group members except the sender	“*{Group name}* • *{Sender name}*”	Same as above	Opens the chat

The user does not get a notification for a chat they already have open, or for a chat they have muted.

2.9 Tasks and Tickets

Notification	When it is sent	Who receives it	Title	Message	On tap
New task	A task is assigned	Assignee	“📋 New Task Assigned”	“*{Assigned by}* assigned you:”*{Task title}*””	Opens the task
New ticket	A ticket is assigned	Assignee	“🎫 New Ticket Assigned”	“*{Assigned by}* assigned you:”*{Ticket title}*””	Opens the Tasks list
Task completed	A task is completed	Person who created the task	“✅ Task Completed”	“*{Completed by}* completed:”*{Task title}*””	Opens the task
Ticket completed	A ticket is completed	Person who created the ticket	“✅ Ticket Completed”	“*{Completed by}* completed:”*{Ticket title}*””	Opens the Tasks list
Deadline tomorrow	24 hours before the task due time	Task creator (on the phone used to create it)	“⏰ Task Deadline Tomorrow”	“*{Task title}* is due in 24 hours”	Opens the task
Due soon	1 hour before the task due time	Task creator (on the phone used to create it)	“🚨 Task Due Soon!”	“*{Task title}* is due in 1 hour”	Opens the task
New comment	A comment is added to a task	The person who wrote it (should be the others)	“💬 New message in *{Task title}*”	“*{Sender}*: *{Comment}*”	Opens the task

2.10 Prayer Times

Notification	When it is sent	Who receives it	Title	Message	On tap
Prayer time	At each of the 5 daily prayer times, based on the phone’s location (Dubai if unknown)	Every user who has not muted prayer	“🕌 Prayer Time”	“🔔 It’s now time for *{Prayer}* prayer” (with adhan sound)	Opens the app

2.11 Check-in / Check-out Reminders (currently switched off)

Notification	Planned schedule	Title	Message
Check-in reminder	08:00–09:00, every 15 minutes, until checked in	“⏰ Check In Reminder”	“Don’t forget to Check In”
Check-out reminder	16:00–17:00, every 15 minutes, until checked out	“⏰ Check Out Reminder”	“Don’t forget to Check Out”

3. Notification Center (bell icon)

Feature	Behaviour
List	Shows the latest 50 notifications
Read status	All notifications are marked as read when the screen is opened
Delete	Swipe a notification to delete it, or use **Clear all**
Tap on a notification	Nothing opens
Circulars and announcements	Not shown in this list (they are in **Circulars & Announcements**), but they are counted in the bell badge
Filter by category	Not available

4. Points for functional review

These behaviours are in the app today and need a business decision or a fix:

1. **Most notifications do not open anything when tapped.** Only chat, tasks, tickets and circulars open a screen. Approvers cannot go from an approval notification (HR request, LPO, invoice, petty cash) to the record.
2. **After a normal login, tapping a notification does nothing** until the app is closed and opened again.
3. **Approvals done from the app send two notifications** to the requester (for example “LPO Approved” and “Purchase Order Approved”). The next reviewer also gets two (“New LPO Approval Required” and “New Approval Required”).
4. **After logout, the phone still receives that user’s notifications.** This matters if a phone is shared or handed over.
5. **The same notification sometimes appears twice** in the Notification Center.
6. **Rejected HR requests** also send “New Request to Approve” to the next approver. From Odoo web, the employee is told the request was “fully processed”.
7. **Annual leave** uses the general title “New Request Submitted” instead of “Annual Leave Request”.
8. **Document expiry** reminders repeat every day for 30 days. Suggestion: send them 30, 7 and 1 day(s) before expiry.
9. **“Document signed”** is not shown while the app is open, and tapping it opens the wrong screen.
10. **Task comments and task completion** notify the person who did the action instead of the other people on the task.
11. **Task deadline reminders** only appear on the creator’s phone, not the assignee’s.
12. **When several petty cash requests are paid together**, every notification names the same petty cash number.
13. **Users with more than one phone** receive most notifications only on the phone they used last. Projects, app menu changes and announcements reach all their phones.
14. **No timesheet notifications** (submitted, approved, rejected). Please confirm whether these are needed.
15. **Check-in / check-out reminders** exist but are switched off. Please confirm whether they should be enabled.

Please confirm for each module:

- Which screen should open when the user taps the notification?
- Are the titles and messages correct?

- Should any notification be added or removed?
